

Berliner

Premium Manual Valve Set

The Berliner valve set is made from solid brass and features a Bakelite control handle. A statement of classic design. The 'Berliner' brings a sense of occasion to a cast iron radiator. This vintage-inspired valve features a fine floral pattern that surrounds the embossed name and heat indicators.

The simple manual valve control gives you the option to adjust your radiator temperature and is suitable for all types of cast iron radiators.

The Berliner is an angled valve set that fits 1/2" BSP bush fittings and pipe widths.
